PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 3+ years of continuous experience designing and shipping production Django/DRF backends and React.js frontends, including uninterrupted freelance backend delivery since 2023 alongside employed roles. Skilled in building scalable REST APIs, secure authentication systems, and complex business logic; comfortable owning features end-to-end in fully remote and hybrid, cross-functional environments.

TECHNICAL SKILLS

Backend: Django, Django REST Framework, Python, JWT Auth, RESTful API Design, Wagtail CMS

Frontend: React.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS

Data & Infra: PostgreSQL, MySQL, SQL Server, Redis, Git

Tools: WordPress, cPanel, Figma, Adobe XD

PROFESSIONAL EXPERIENCE

Frontend Web Developer

Dec 2024 – Present

National Employment Agency (ANEM), Algiers — Hybrid

- Frontend developer on the reinvention of the Wassit Online national employment platform, improving usability and accessibility for a large public user base.
- Contributed to the redesign and development of name.anem.dz, implementing modern, reusable UI components with React.js and Tailwind CSS.
- Integrated frontend applications with secure REST APIs (.NET) developed by backend teams, in close collaboration with UX/UI and backend teams.
- Participated in code reviews and performance optimization within a cross-functional, hybrid-working team.

Freelance Full-Stack Developer (Django | DRF | React.js)

Sept 2023 – Present

Independent — Remote

- Maintained continuous, independent backend and full-stack delivery for external clients throughout employed roles, architecting Django/DRF systems end-to-end.
- Digital Skillers Platform: built a freelance marketplace with Django, DRF, and React, implementing custom serializers, filtering, pagination, and role-based access logic for multiple user types.
- DivaLootShop (E-commerce): developed secure multi-method payment workflows, order management APIs, and optimized database queries to support real transaction volume.
- Skinner Recruit: built a recruitment platform with DRF, designing serializers for structured CV data with custom validation and scalable backend logic.
- Palace of Languages: built a Django & Wagtail CMS platform with custom content models and dynamic content-management workflows for non-technical editors.

Web Development Trainer (Beginner Level)

Aug 2024 – Present

Independent

- Delivered beginner-level web development training covering HTML, CSS, and JavaScript fundamentals.
- Designed hands-on exercises and small projects to help learners build practical, job-ready skills.
- Introduced responsive design and clean-code best practices to non-technical learners.

Full Stack Web Developer
DIVATECH, Mohamadia, Algiers

May 2023 – Aug 2024

- Designed and developed a modular ERP system covering inventory, HR, accounting, and project management.
- Built a custom CRM platform to improve customer engagement, tracking, and reporting.
- Implemented full-stack features end-to-end using Django, React.js, JavaScript, and SQL databases.
- Improved system scalability, security, and data accuracy by applying clean architecture principles.

Backend Developer Intern (Graduate Project)
CERIST, Algiers

Jan 2023 – Jul 2023

- Developed backend services using Django and Python for a graduate research project.
- Applied system modeling techniques and relational database schema design.
- Managed integration between frontend and backend layers.
